

2019

Eye Health Program- Rapti & Bahadurgunj (Rapti Eye Hospital, CKNEH-Bahadurgunj, Lamahi Eye Hospital)

ANNUAL REPORT- 2019

The Norwegian Association of the
Blind and Partially Sighted

PREFACE

It is our pleasure to present Annual Report- 2019. Eye care service provided to 291,353 (M43%, F57%) people in this year. It has increase by 3.12% comparatively with last year (282,539 OPD in 2018). And 13,286 cataract surgeries were performed which is decreased by 2.75% comparatively with last year (13,661 Cataract surgeries in 2018). Phaco surgery has been increased (increase by 28.78% than last year) in number but the number of Cataract surgeries has decreased this year.

Out of 13,286 cataract surgeries, I-care has supported for 1974 (15%) cataract, Local Government for 867 (7%) cataract, Nepal Government through CNNJ for 376 (3%) cataract, DAK foundation through CNJJS for 294(2%) cataract, Full support from Hospital source for 218 (2%) cataract, Provincial government for 100 (1%) cataract, Health Insurance for 13 cataract and personal support for 4 cataract surgeries.

Refractive error is a major cause of visual impairment. This year, we have corrected vision of 18,124 (M41%, F59%) patients which is increased by 18.26% (15,326 refraction in 2018) comparatively with last year.

Basic eye health training is a powerful tool for increasing referral system, increasing in awareness of eye health and advocacy of eye health service. This year, eye health training was provided to health cadre, volunteers, traditional healers, media personals and elected members at local level. The total 425 (Female 39 %/ Male 61%) person were provided basic eye health training.

The construction work of OPD building at Rapti Eye Hospital and staff quarter at Lamahi Eye Hospital is on progress.

Advocacy work is the sustainable approach of the program. Several meetings, discussions and approaches were done at local, provincial and central level. This year also, Rural Municipality, Municipality, Sub-Metropolitan has supported to clear the cataract backlog. Honorable Mr. Metmani Chaudhary and team have given continuity by allocating Rs 5 million for the construction work of staff quarter at Lamahi Eye Hospital. Similarly, Provincial Government of Province No. 5 has allocated Rs. 5 million through Tulsipur Sub-Metropolitan for the continuity of construction work of Rapti.

National Health Policy-2076 of Nepal Government has addressed to eye health service. The policy has clearly indicated about the integration of basic eye health care service into fundamental health service. NNJS/Eye Health Program-Rapti & Bahadurgunj has

established a Primary Eye Care Centre at East Rukum with the full financial support of Sishne Rural Municipality as per the norms of National Health Policy-2076.

We have provided eye care service to the people of very remote place of Kalikot District in Karnali Province.

In order to maintain transparency of our work and to get feedback from the stakeholders, we have conducted Press Meet, Social Audit Program, Priority Setting and Strategic Workshop this year too.

We would like to extend our sincere thanks to Mr. Terje B Iversen, Director International Development Cooperation, NABP, Ms. Eli Bjørnebråten and Ms Kristin.Kjaeret, Programme director of NABP, and Ms Sissel Halden for their warm support. We are very grateful to NORAD/NABP-Norway for their continuous financial support.

We extend our thanks to Central NNJS, NNJS-Dang Branch, Nepal Government, Provincial Government, Local Government and concerned authorities, Local Donor, Social Workers, and Volunteers for their support.

Thanks to our entire team (Ophthalmologists and staffs) for their hard work and dedication to achieve the Goal and Objective of the organization.

Last but not least, we want to thank Mr, Hari Saran Bista-Project Manager, Mr, Prakash Bdr Ghimire, Finance controller and Miss Surekha Gurung, Administrative Officer- NABP, Kathmandu who made the required assistance and proper guidelines for making the eye health program-Rapti & Bahadurgunj success and sustain.

Thank You

Mr. Krishna Kumar Giri

Chairman,

Hospital Management Committee

Dr. Sulaxmi Katuwal

Chief Medical Director

Mr. Samsher Thapa

Senior Administrative Officer

INTRODUCTION

Federal Democratic Republic of Nepal is a land locked country in the Himalayan Region with the Tibetan Region of the People's Republic of China to the North and India to the South, West and East. Its length is approximately 885 K.M from west to east and has a maximum width of 245 K.M

(mean width 197 K.M) covering an area of 147181 Sq K.M The Country has a mountainous belt to the north covering 35% of the total land area, the flat

and highly cultivated Tarai in the South which amounts to 23% of land area and the Central hills in the middle which is 42% of the land area. Administratively the country is divided into 7 Provinces, 77 Districts, 6 metro cities, 11 sub-metro cities, 276 Municipalities, 460 rural Municipalities. Provinces are the first subdivision of country. Each provinces is further subdivided into districts, and each districts into municipalities and rural municipalities.

BACKGROUND

World Health Organization in cooperation with Nepal Government (NG) in 1980/81 carried out the most comprehensive blindness survey undertaken in any country until now. In 116 villages and wards all over Nepal nearly 40000 persons were given an eye examination and a number of ancillary studies were performed.

The survey showed that in a population of 14 million 0.84% were blind in both eyes. Some of the causes were considered outside the reach of medical prevention or treatment but fortunately most of the blindness was avoidable. Cataract was the

dominant cause with 84%. Next was trachoma with 3% It was therefore decided by WHO to start a blindness prevention project in Seti and Mahakali Zones, (Province no 7 and 5) and with support from NORAD a 100 bed low cost eye hospital was established in Geta, near to Dhangadhi (for Seti and Mahakali Zones) for various reasons NORAD chose to have Norwegian Church Aid (NCA) take over the project from WHO. This was effected from November 1st 1985, based on agreement with Social Welfare Council and Nepal Netra Jyoti Sangh.

The project was extended to Rapti Zone in 1986, where a new hospital was inaugurated early 1986. Similar projects later started in most of the Zones of Nepal, funded by foreign NGOs under the umbrella of Nepal Netra Jyoti Sangh.

Norwegian Church Aid (NCA) had started to support Eye Health Program establishing the **Eye Hospitals at Geta, Dhangadhi -Kailali in 1985** and later in **Tulshipur-Dang in 1986**.

In 1996 a dialogue was held between NCA & NABP (Norwegian Association of the Blind and Partially Sighted) investigating the possibilities of NABP taking over the NCA's role as funding partner to the Rapti Eye Hospital, Dang to deliver eye health service in Rapti Zone covering five districts (Dang, Rukum, Rolpa, Salyan and Rukum) **NABP** showed interest not only in maintaining the previous eye care activities at the Hospital, but also in expanding activities in the field of Training/Rehabilitation of blind and partially sighted . **NABP** took over the role of the NCA as a founding partner to Rapti Eye Hospital, Dang on 1st January 1998 to 2011 and extended its support to Eye Health Program II, Lamahi from 2012.

THE DONOR AGENCY

The Norwegian Association of the
Blind and Partially Sighted

Norwegian Association of the Blind and Partially Sighted (NABP), a Norwegian International Non-Governmental Organization (INGO), established in

September 1900 as a non-profit-making, secular, non-political self-help organization. This organization works towards full participation and equal rights for blinds and Partially Sighted People. Its primary objectives are to support the strengthening of organizations of the Blind at the national level through making them self-reliant, strong and sustainable, to combat blindness through eye health programs and to promote and support the rehabilitation of blind and partially sighted people. It has been supporting Blind and Partially Sighted people of Nepal in partnership with Nepal Netra Jyoti Sangh (NNJS) and Nepal Association of the Blind (NAB). It has also programmed in other developing countries.

NEPAL NETRA JYOTI SANGH

(Estd. 1978)

Nepal Netra Jyoti Sangh (NNJS) is a leading national eye care providing agency for comprehensive eye care service in the country. It was established in 1978 as a National Society for the prevention and control of blindness. Under NNJS 18 Eye Hospitals and more than 80 primary Eye Care Centers are running. The main role of NNJS is to make a national strategy,

supervise, monitor and ensure quality of services in eye hospitals and centers. It is responsible for overall guidance and leadership for smooth and efficient running of programs, expansion of program nationwide, coordination with government and local authorities, instructing the hospital to conduct more activities to reach to unreachd eye patients, evaluate the target and achievement, train more and more human resource, aware the civil society about preventive and curative remedies of eye care.

WORLD BLINDNESS SITUATION

According to estimate from the World Health Organization (WHO) , about 217 million people are MSVI, 36 million people are blind. In total **253** million people are visually impaired. 124 million people have uncorrected refractive errors and 65 million have cataract. More than 75% of all blind and MSVI (Moderate and severe vision impairment) is avoidable. There is estimated of 1.1 billion people with near vision impairment. 89% of vision impaired people live in low and middle income countries and 55% of moderate or severely vision impaired people are women. Top leading cause of visual impairment is refractive errors, cataract and age related macular degeneration (AMD). And major cause of blindness is cataract , uncorrected refractive error, glaucoma, diabetic retinopathy, corneal opacity and trachoma.¹

VISION 2020- RIGHT TO SIGHT

In order to reduce global burden of blindness, WHO and broad coalition of international organizations and private organizations launched a global initiative vision 2020 “Right to Sight” in Geneva 18th February 1999. Similarly the South Asia Region (SEARO) declared on 30 September for member countries to come forward for the strategies and guidelines for the elimination of Blindness from the Region 2020. Perceiving the urgent need to eliminate the blindness Government of Nepal formulated “Apex Body for Eye Health” on 6th October 1999 under the Ministry of Nepal and vision 2020 “Right to Sight” program declared at the VI Ophthalmology Congress of SAARC countries held in November 1999 at Kathmandu, The objectives are to: eliminate avoidable blindness by developing an integrated approach to disease control, human resource development, as well as infrastructure and technology developmental various levels of the health care system. Nepal is aiming by the end of the 2020 all the districts of Nepal there will be basic eye care facilities and cataract surgical rate (CSR) will be at least 6000.²

BLINDNESS SITUATION OF NEPAL

After the first blindness survey of 1980-81,(prevalence of blindness 0.84%) the second population based surveys on blindness and visual impairment was conducted in 2006-2010. (prevalence of blindness 0.35%) In this survey, the rapid

² Nepal Netra Jyoti Sangh, Strategic plan for the eye care service in Nepal, 2013-2020, p(26)

assessment of avoidable blindness (RAAB) methodology was applied. This surveys were conducted in all 14 Zones of Nepal. In total, 39,908 people aged 50 years and older were examined. The eye care infrastructure during the period of 1981 was very minimal in Nepal, only one eye hospital and 4 eye departments in general hospital. During this period upto 2010, there were 20 eye hospitals, 19 eye departments , 63 primary eye care centers and the number of ophthalmologist increased from 7 to 147. The number of cataract operation increased from 1,000 in 1981 to more than 200,000 in 2010. Compared with the National Blindness Survey the prevalence of blindness has reduced from 0.84% in 1981 to 0.35% in 2011. The impact of the expansion of eye care service between 1981 and 2011 is best impact in the reduction of the prevalence of blindness and visual impairment. In actual numbers the achievements are far less outspoken because the number of people aged 50 plus more than double between 1981 and 2011 and the life expectancy at birth increased from 48 to 66 year.³ (life expectancy has increase to 71years in 2018)

RAAB survey of 2006-2010 has revealed that the cataract was the main causes of blindness (65%), from earlier 72% in 1981. This is followed by retinal dieseses 9%, corneal diseases 6%, glaucoma 5%, ARMD 4%, refractive error 4%.⁴

BLINDNESS SITUATION IN PROJECT AREAS

Rapti Eye Hospital has performed various activities and different initiatives were taken to reduce blindness in Rapti Zone. The initiative stresses the importance of universal eye health coverage – specifically that the poor have access to affordable (mainly free) eye health services. Currently the Rapti zone is one of the three best performing zones

Figure 5: Distribution of Blindness PVA <6/60

regarding prevalence of blindness and has already reached NNJS's objectives of <0.2% with VA <3/60 (meaning those who are blind). The impact of the program can be seen as the people who were visually impaired experience improved health, living conditions and quality of life. NNJS has as it general objectives “to reduce the present prevalence of blindness (VA <3/60) from 0.35% to <0.2% and economic

³ The Epidemiology of Blindness in Nepal:2012, Nepal Netra Jyoti Sangh, Kathmandu

⁴ Sapkota YD, Upadhyay Madan, (2011) Burden of Blindness and Eye Disease in Nepal, Mid Term Review of Vision 2020: The Right to sight, Nepal, Annex Body for Eye Health (p20)

blindness (VA <6/60) 0.8% to 0.4% by 2020. In the Rapti zone, these goals were almost reached already in 2010. That year 0.13% had vision of VA <3/60 and 0.52% VA < 6/60. (RAAB Survey Report 2012)

Eye Health Program-Rapti & Bahadurgunj has already reached this goal. In Rapti Zone the back log has been reduced from 0.87% in 1981 to 0.13% in 2012 (The RAAB survey 2012). Eye health service has had a big impact in Rapti Zone and has achieved one of the best results so far in Nepal.

After vision restoration, people have become active; life expectancy has increased (48 in 1981 to 71 in 2017), returned back to their regular work which contributed significantly for uplifting their economic condition and living standard. They have started managing their daily life and taking responsibilities of their family. (GDP per capita in Nepal has increased by US \$ 267.10 to 728.40 period between 1960-2017) (Source: <https://tradingeconomics.com/nepal/gdp-growth-annual>)

EYE HEALTH PROGRAM- RAPTI AND BAHADURGUNJ

There are three eye hospitals (Rapti Eye Hospital, Chhanda(kalebabu)-Narayani Eye Hospital and Lamahi Eye Hospital) four primary eye care centres (Ghorahi Eye Centre, Salyan Eye Centre, Rukum Eye Centre, and Sulichaur Eye Centre, Rolpa) one referral clinic (Krishnanagar referral centre) and one weekly clinic (Koilabash weekly clinic) under Eye Health Program-Rapti & Bahadurgunj.

Nepal Netra Jyoti Sangh has recognized Eye Health Program-Rapti & Bahadurgunj as the group of governing body. It is a support program to continue the efficient running of 50 Bedded Rapti Eye Hospital, Tulsipur, 100 Bedded Chhanda(Kalebabu)-Naryani Eye Hospital, Bahadurgunj, 50 Bedded Lamahi Eye Hospital, Lamahi and its settalite eye centres.

VISION

Reduce prevalence of blindness and visual impairment and improve the quality of life by providing quality eye are service and leading program to an Academic Institution.

MISSION

To provide quality, easily accessible and affordable service under integrated health policy of Nepal Government by strengthening the existing health facilities and increasing the population under cover.

GOAL

Sustainable development of Eye Health Program- Rapti & Bahadurgunj by the year 2024.

OBJECTIVE

- To sensitize general people and make them aware about eye health.
- To support National Health Policy of Nepal and achieve the goals of Vision 2020
- To equip hospitals with modern technology and infrastructure development as per the master plan.
- To upgrade the Hospitals to tertiary level Hospital.
- To develop as a academic, training and research institution.
- To enhance capacity of employees (HR) by providing them appropriate training.

MAJOR ACTIVITIES

- Provide Curative, Pro-motive, Preventive and Rehabilitative service.
- Conduct outreach activities , eye health education and eye health campaign to generate awareness and to make referral system strong.
- Eliminate the main cause of avoidable blindness.
- Continuous education and training opportunities for employees to enhance them for quality service.
- Rehabilitation service through CBR wing at base hospital.
- Continues development of infrastructure as per master plan.

- Advocacy for sustainable development of eye health program in Rapti and Kapilbastu at Local and Central level.
- Equipped hospital with modern equipments and technology.

SERVICE AREAS

Eye Health Program- Rapti & Bahadurgunj has been providing eye health service in 4 districts of Province number 5 (Dang, Rolpa, Pyuthan and Kapilbastu) and 2 districts of Karnali Province (Western Rukum and Salyan). There are 1.47 million Populations in Dang, Rolpa, Pyuthan, Salyan and Eastern, Western Rukum districts and .57 million populations are in Kapilbastu District.

HOSPITALS/PECC UNDER EYE HEALTH PROGRAM

RAPTI EYE HOSPITAL

Rapti eye hospital is located at Rakshyachaur-4, Tulsipur, Dang, Rapti zone which is in the province number 5 & 6 of Nepal and has a population of 1.4 million. It has 4 Bigha (2.70 hectare) land which is registered in the name of Nepal Netra Jyoti Sangh.

According to the Nepal Blindness Survey of 1981 the prevalence of blindness in Rapti was 0.87% which was

reduced to 0.13% in second survey of 2010 (RAAB Survey). Rapti Eye Hospital is 50 bedded eye hospital which was established in 1986 with the support of Norwegian Church Aid (NCA), Norway. Later in 1996 a dialogue was held between NCA & NABP (Norwegian Association of the Blind and Partially Sighted) investigating the possibilities of NABP taking over the NCA's role as founding partner to the Rapti Eye Hospital, Dang. **NABP** showed interest not only in maintaining the previous eye care activities at the Hospital, but also in expanding activities in the field of Training/Rehabilitation of blind and partially sighted . **NABP** took over the role of NCA as funding partner to Rapti Eye Hospital, Dang on 1st January 1998 to 2011 and extended its support to Eye Health Program II, Lamahi from 2012. There are four Primary Eye Care Centres (GEC, SEC, REC, SEC-Rolpa) running under Rapti Eye Hospital. This hospital provides comprehensive eye care service i.e. curative, preventive, pro-motive and rehabilitative service.

LAMAHİ EYE HOSPITAL

Lamahi Eye Hospital was started in 2002 in Deukhuri, Dang as a weekly satellite clinic of Rapti Eye Hospital. Later on 9th September 2009, it was upgraded to Primary Eye Care Centre with an objective to upgrade it as a full fledged eye hospital. This objective was soon fulfilled with the financial support of NABP and needful land (2.88 acre) support at free of cost by Town Development Committee,

Lamahi. The foundation stone laying ceremony was held in 23rd Nov 2010. The construction work was completed in 2012 and eye service was started from own building from 2013. Later, the building was inaugurated in 2014 as a full fledged eye hospital. It has big catchment area; aiming to provide eye health service to the people of Rolpa,

Pyuthan, Arghakhachi districts and part of Banke district. The Lamahi Eye Hospital is centrally located between Chhanda(Kalebabu)-Narayani Eye Hospital, Bahadurgunj and Rapti Eye Hospital, Tulsipur. Weekly clinic at Koilabash (near to Indian boarder) is managed by Lamahi.

CHHANDA(KALEBABU)-NARAYANI EYE HOSPITAL

NNJS-Rapti Eye Hospital and NAB-Rehabilitation program were jointly working for the curable and incurable blind in Rapti since 1998 with the support of NABP-Norway. After phase out from Rapti, NAB-Rehabilitation program was started in Bahadurgunj of Kapilbastu District in 2004. The eye care and rehabilitation service for curable and incurable blind was good experience for NNJS and NAB. Hence, NNJS-Rapti Eye

Master Plan of CKNEH-

Hospital had decided to start a referral eye centre jointly with NAB-Rehabilitation Program in Bahadurgunj Kapilbastu in 1st December 2004. The main objective of the centre was to provide eye service for the curable blind. NAB-Rehabilitation program had conducted door to door survey and found near about thirteen thousand curable blind in Kapilbastu. The result of survey work and finding of curable patients in Kapilbastu encouraged to NNJS-Rapti Eye Hospital to upgrade it into a surgical centre. Previously it was started in a rented house in Krishnanagar and later shifted to a rented building and land in Bahadurgunj as a Surgical Eye Care Centre. Gradually, the number of Nepali patients as well as Indian patients started to increase in the centre. The service provided by this centre and satisfaction of patients has supported to convince Ms Narayani Shah, owner of land and building to donate land to upgrade this centre as a full fledged hospital. She donated 1.41 acre land to centre on 5th September 2012. This centre has been recognized as Chhanda (Kalebabu)-Narayani Eye Hospital, Bahadurgunj from central NNJS and honored to Ms Narayani Sha. The foundation stone laying ceremony of ward building was held on 15th July 2014. It has one referral centre in Krishnanagar.

GHORABI EYE CENTRE

It was established in 1989. It is situated inside the premises of Sub-Regional Hospital of Nepal Government at Ghorahi, Dang. Mr. Ganesh Sharma, a local donor had constructed the building. He was blind by birth and donated this building for eye care service. In average 60-70 patients are getting eye care service daily. This centre is centrally located between Rapti Eye Hospital and Lamahi Eye Hospital. Patients are referred for cataract surgery to base hospital. Nepal Government is providing partial financial support to this centre.

SALYAN EYE CENTRE

This center was established in 1st January, 2007 at Khalanga of Salyan District with the administrative support of Nepal Red Cross Society of Salyan by providing free room for eye care service. But due to less access of patients in Khalanga, the management

team of Hospital and Nepal Red Cross team of Salyan jointly agreed to shift the centre in Shreenagar of Salyan from June 2012. In average 15-20 patients are getting eye care service. The patients are referred to Rapti for surgery and other major treatment. There is coordination committee team for the overall development of centre. Nepal Government is providing partial financial support to this centre. The centre is running in rented building of Krishi Samagri Sansthan-A government building. The local donor have donated free land at the same place (shreenagar) and the team are actively participating to get the fund from Government at local level for the construction of building.

RUKUM EYE CENTRE

This center was established at Musikot, Rukum in 2011. The population of Rukum District is more than .2 million and has benefited by this centre. At present this is running at a rented house of Nepal Red Cross Society, Rukum. Nepal Government is providing partial financial support to this center. Nepal Netra Jyoti Sangh, Rukum Branch was established in 2016 which is managing the centre. The local donor have donated land to this centre and the team members are trying to get fund support for the construction of building.

SULICHAUR EYE CENTRE, ROLPA

This center was established at Sulichaur, Rolpa on 16th February 2016. It was inaugurated by than honorable home minister Mr, Krishna Bahadur Mahara. This centre is referral centre of Rapti. At present this is running in a rented house.

KRISHNANAGAR REFERRAL CLINIC

Krishnanagar Referral Clinic was started in 2014 in order to make easy excess to patients and also to make referral system strong for the CKNEH-Bahdurgunj.

KOILABASH WEEKLY CLINIC

Koilabash weekly clinic was started from 2013 in order to make referral system strong for Lamahi Eye Hospital. This centre is situated near to Indian Boarder (34 KM away from Lamahi Eye Hospital).

PRIMARY EYE CARE CENTRE-EAST RUKUM

PECC-East Rukum was established on 11th May 2019. This centre is fully supported by Local Government of Sishne Rural Municipality. As per the National Health Policy 2076, integration of eye health into basic health system, this centre was established to provide the eye care service to the very needy people of remote places. It was inaugurated by the Chairman of Sishne Rural Municipality. This centre is running under Joint program i.e technical support is provided by NNJS-Eye Health Program and financial and infrastructure support is provided by Sishne Rural Municipality. A co-ordination committee has been formed for the management as well as development of the centre. Eastern Rukum is the new district (1,161.13 Sq KM) under Province number 5 and has a total population of 53018.

TOTAL OPD SERVICE		2,838,540

CUMMULATIVE DATA – 1986 TO 2019		CATARACT
RAPTI EYE HOSPITAL (1986 TO 2019) :		29,359
LAMAHİ EYE HOSPITAL (2013-2019) :		7,633
CKNEH BAHADURGUNJ (2005 TO 2019) :		106,685
GHORAHİ EYE CARE CENTRE (2008-2019) :		887
FREE SURGICAL CAMP/DST (1996 TO 2019) :		36,424
TOTAL CATARACT SURGERY		180,988

From 1986 to 2019 (33 years), 2.83 million people (28 lakh 38 thousand 540) have got eye care service (OPD service) by Eye Health Program-Rapti & Bahadurgunj. Out of these numbers, 431,572 (four lakh thirty one thousand five hundred seventy two) have got free eye care service (OPD service)

During this 33 years period, 180,988 (1 lakh 80 thousand 988) cataract surgeries are performed. Out of these numbers, 36,424 surgeries were performed in free surgical eye camp.

ACHIEVEMENT - 2019

OPD-2019

All three eye hospitals and eye centres under Eye Health Programme- Rapti and Bahadurgunj provided OPD service to 291,353 (Male 43% / Female 57%) patients. In overall, the number of OPD has increased than last year but comparative with Hospital wise, OPD has decreased in CKNEH Bahadurgunj.

EAR SERVICE – 2019

This year, Rapti has provided OPD service to 2428 patients (41%Male/ 59%Female) and Lamahi has provided OPD service to 4189 (38%Male/ 62%Female) ear patients. All together 6,690 (39%Male/61% Female) ear patients were treated in 2019.

CATARACT SURGERIES – 2019

In three base hospitals, 10,894 cataract surgeries were performed and 2,392 cataract surgeries were performed in outreach activities during period of Jan to Dec 2019. In Total, 13,286 (47% Male and 53% Female) cataract surgeries have been performed during this period.

FREE CATARACT SURGERY- 2019

Out of 13,286 cataract surgery, 9,439 (71%) surgeries were self paid, 1974 (15%) surgeries were supported by i-care, Local government supported for 86 (7%) Nepal Government through CNNJS for 376 (3%), DAK Foundation through CNNJS 294 (2%), Hospital own income for 219 (2%), Province government for 100 (1%), 13 from health insurance and 4 from personal support.

The number of phaco surgeries has increasing in good trend. 956 phaco surgeries in 2017, 1623 in 2018 and 2969 phaco surgeries in 2019.

OTHER MINOR SURGERY- 2019

Total 2,505 (38% Male and 62% Female) other minor surgeries were performed in all three eye hospitals and outreach activities.

VISION CORRECTION (REFRACTION SERVICE)- 2019

12,715 refractive errors were corrected by refraction in base hospitals, 3,089 in PECC, 1,223 in out-reach program and 691 in school screening. In total 18,124 (41% M/ 59% F) refractive errors were corrected by refraction.

BASIC EYE HEALTH TRAINING-2019

Eye Health training was conducted with the support of NAPP-Norway, the basic eye health training was provided to Health Post In-charge, FCHV (health personal), Mothers Group (volunteer), Drug Retailer (health care provider), Traditional healer, elected political leaders, journalist and School teachers. Total 425 (39% M and 61%F) person received basic eye health training which will enable them to be a good eye health cadre as well as will support in making referral system strong.

EYE HEALTH EDUCATION/SCREENING CAMP/SURGICAL CAMPS/AWARENESS PROGRAM

School eye health education is a part of awareness and advocacy program. The main objective of eye health education is to provide information and knowledge about common eye diseases for early intervention. This year in 2019 (Jan-Dec), we have provided eye health education to 15099 students.

Free eye check up for school children was conducted in 40 schools where 15,099 students were examined (Boys 48% / Girls 52%). Among them 637 students (Boys 49% / Girls 51%) were prescribed glasses which were provided to them free of cost with the support of central NNJS.

Eye Health Education/Screening Camp/Surgical Camps/Awarness activities	Achievement of 2018	Target for 2019	Male	Female	Total

Awareness message were delivered in the various activities i.e before starting free surgical eye camp at camp site, general assembly of NNJS, press meet and social audit program. To aware the patients and visitors as well the eye health message were broadcasted regularly from the radio system of Hospital which is placed at IPD, OT and OPD.

EXPOSURE TO STAFF AND MANAGEMENT TEAM- 2019

Two staffs (Dr Nita Sunam and Mr. Jogi Ram Chy) were participated in International Seminar (APAO) in Hongkong,

Three Paramedical Staffs (Mr, Amrit Nepal OA, Mr, Madan Chaudhary, Optometrist, Mr Sushil Karki, Optometrist) participated Low vision and Vision therapy training respectively.

One Medical (Dr Suresh Rasaili) received training on Phacoemulsification in India

Five administrative staffs from three hospitals (Meena Thapa, Kamal Chaudhary, Deepak Mahat, Hemanta Basnet, Hum Bdr Chaudhary) participated two days store management training.

Two Medical and Paramedical staffs (Dr Kaushal Pokhrel and Manju Roka) participated RAAB Survey training.

Volunteers, Medical, Paramedical and Administrative staffs (13 nos) have participated workshop in Biratnagar, Bhairahawa and Kathmandu.

SUCCESSFUL STORY

Happiness returned after six years

There is saying goes like if there is vision everything can be seen but if vision of eye is lost the whole world will be dark.

A thirteen year old girl, Ms. Kiran Teli, resident of Krishna nagar – 7 Karma, was compelled to live her life in such darkness for six years. She had been blind due to cataract in her eyes which can be cured by operation. She received her vision back after operation.

The first day
(surgery day)
Ms. Kiran and
her mother
looked very sad.
In fact tear was
rolling down
from her
mother's eye.
Kiran herself
was also looked
very terrified.
After escorting
their daughter to
Operation

theatre, mother was crying like anything. But in no time their sadness transformed into happiness.

Kiran and her family were very happy when the doctor unfolded her bandage the next day after surgery and Kiran could see everything very clearly. The boundless happiness could be seen in the face of Kiran's parents.

When the bandage on her eye opened and doctor asked showing her finger to say the number of fingers she became very happy and said that she could see everything as before. She hugged everybody, her surgeon, representative of donor agency NABP Norway and all the staff and expressed her gratitude.

Mr. Ram Baras

Teli, Kiran's father had dream to send his daughter to school and make her well educated renowned person but due to her blindness she was compelled to live in the darkness. Because of the financial constraint they were not able to do treatment. She was identified as both eye blind during the free screening camp organized by Chhanda (Kalebabu) eye hospital with the financial support of icare NABP Norway. Later her operation was done in

Rapti Eye

Hospital, Tulsipur in the financial support of icare NABP Norway.

Kiran's father expressed his feeling that they were more than happy that their daughter has received new life.

He further said that they have found the hospital in the form of god. He also said that they will realize the dream of their daughter to get education.

A medical team headed by ophthalmologist Dr. Suresh Rasaili had performed the surgery of Ms. Teli. Mr. Sven Castberg from Business Department NABP Norway and other members and Mr. Hari Sharan Bista, Project Manager NABP Nepal had come to Dang during her surgery.

The team from Norway decided to offer her Rs. 130,000 for her further study. After the surgery, when she became fully sighted, she joined school. Now she is studying in class six.
